PROFESSIONAL SUMMARY

IT undergraduate pursuing a BICT at the University of Colombo alongside an external BIT at the University of Moratuwa, with hands-on experience across backend development, AI/ML, and full-stack web projects. Proven ability to design and build practical software solutions spanning desktop, web, and machine-learning applications. Seeking an entry-level or trainee software engineering role to apply strong programming, database, and problem-solving skills in a production environment.

PROFESSIONAL EXPERIENCE

14 Dec 2025 – 14 Jun 2026

Avissawella, Sri Lanka

Backend Developer (Intern)

SoftwarePlus Pvt Ltd

- Designed and implemented core database models for an ERP system, including User, Teacher, Attendance, Leave, and Fee Structure management modules
- Built authentication and authorization with role-based access control (RBAC) for secure user management
- Designed and implemented RESTful API endpoints supporting HR, Finance, and ERP operations
- Developed HR Employee Management and Finance Fee Structure functionalities and related backend services
- Integrated backend APIs with frontend dashboards for HR and Finance modules, ensuring seamless data communication
- Implemented complete CRUD operations for employee and finance-related records
- Established database relationships, schema design, and migration scripts to support enterprise application requirements
- Performed backend testing, debugging, and workflow optimization; collaborated using Git and Agile practices

EDUCATION

2024 – 2028

BICT

University of Colombo

2025 – 2027

BIT (External)

University of Moratuwa

2AB

District: 5

AL – Technology Stream

CERTIFICATES

Diploma in Information Technology

University of Moratuwa

Diploma in ICT

DMI

AI/ML Engineer

SLIIT

AWS Certified – Data Engineering

Amazon Web Services (AWS)

PROJECTS

Event Management System

C#, SQLite

Built a desktop application for managing event registrations and scheduling, using SQLite for persistent data storage.

ERP System

HTML, CSS, JavaScript, Node.js

Designed and developed a web-based Enterprise Resource Planning (ERP) system using Node.js on the backend.

Portfolio Website

HTML, CSS, JavaScript

Built a personal portfolio site to showcase projects, skills, and background.

SkillBridge AI

TypeScript

Developed an AI-driven application in TypeScript to support skill-building and career development.

Sign Language Detection System

Python, Computer Vision, OpenCV, MediaPipe, Scikit-learn

Built a computer-vision system to detect and classify sign language gestures in real time, using MediaPipe for hand tracking and Scikit-learn for gesture classification.

AI Resume Chatbot

Python, Jupyter Notebook

Developed a chatbot prototype to assist with resume-related queries using natural language processing techniques.

AI Image Maker

Python, Jupyter Notebook

Built a Python-based tool to generate images using AI/ML techniques.

To-Do App

Android Studio

Developed a native Android task-management application to help users track and organize daily tasks.

TECHNICAL SKILLS

Programming Languages

Python, Java, JavaScript, PHP, C#, HTML5, CSS3

Databases

SQLite, PostgreSQL

AI/ML

Machine Learning Basics, Rule-Based Chatbots, OpenCV, Scikit-learn

Web Technologies

HTML, CSS, Node.js, Express.js

Tools & Platforms

Git, GitHub, VS Code
